

Analyst / Technical Report — CTF-CONTACT-ME-MEM

Report ID:

65edb19d6a108c6036b55d1c3516abee06a99719e79417d9c6cbda7669c01166 ·

Snapshot: 2026-06-07T01:33:07.469554+00:00

Likelihood scale (FIRST 5-tier): almost_certain > highly_likely > likely > unlikely > remote. Likelihood estimates the probability of the assessed activity; it is kept separate from analytic confidence.

Confidence (LCA): high / moderate / low — the analyst's confidence in the assessment given evidence quality and corroboration. Distinct from likelihood.

Findings

Memory image unprofileable: Volatility3 2.28.0 could not validate a Windows kernel symbol table, so pslist/netscan/malfind/svcscan returned placeholder/empty results (no clean-or-compromised determination possible)

• **Finding ID:** F-CONTACTME-001 · **Severity:** medium · **Likelihood:** unlikely · **Confidence:** high · **Risk score:** 6

Evidence: evidence SHA-256
