

SRL-2015-APT-ENTERPRISE — Full Forensic Report

Case **SRL-2015-APT-ENTERPRISE** · Agentropix-SIFT Forensic Pipeline

Case ID: SRL-2015-APT-ENTERPRISE Snapshot: 2026-06-10T19:31:30.472433+00:00 Report ID: 562edbddc9e5bfc79905831...
Hosts: 4 Approved findings: 17 IOCs (enriched): 109 Malicious IOCs: 12

1. Case Summary

This report consolidates the reconciled, approval-gated forensic findings for the multi-host APT intrusion tracked as **SRL-2015-APT-ENTERPRISE**. The campaign spans **4 acquired hosts** (disk + memory images) processed through the Agentropix-SIFT Trinity pipeline. Aggregate raw findings total **2,233**; ~**2,874** evidence documents are live on Wazuh. Of those, **17** high-signal findings have been reviewed and approved for this report, and **109** indicators were enriched against VirusTotal + AlienVault OTX, confirming **12 malicious** indicators.

Per-host finding counts

Host	Disk findings	Memory findings	Total
win7-32-nromanoff	250	10	260
xp-tdungan	339	10	349
win7-64-nfury	484	432	916
win2008R2-controller	196	512	708
TOTAL	1,269	964	2,233

Approved-finding severity mix

Severity	Count
CRITICAL	1
HIGH	14
MEDIUM	2

2. MITRE ATT&CK Technique Rollup

Techniques observed across the 17 approved findings:

ATT&CK Technique	Name	Approved findings
T1071.001	Application Layer Protocol: Web Protocols	2
T1078.002	Valid Accounts: Domain Accounts	2
T1543.003	Create or Modify System Process: Windows Service	1
T1011	Exfiltration Over Other Network Medium	1
T1055	Process Injection	1
T1620	Reflective Code Loading	1
T1036.005	Masquerading: Match Legitimate Name or Location	1
T1070.004	Indicator Removal: File Deletion	1
T1021.002	Remote Services: SMB/Windows Admin Shares	1
T1569.002	System Services: Service Execution	1
T1005	Data from Local System	1
T1560.001	Archive Collected Data: Archive via Utility	1
T1052.001	Exfiltration over Physical Medium: USB	1
T1091	Replication Through Removable Media	1
T1070.006	Indicator Removal: Timestomp	1

3. Approved Findings

Severity	ATT&CK	Host	Finding	Conf.
CRITICAL	T1543.003	win2008R2-controller	DC C2 implant 'usboesrv' (KernelPro USB over Ethernet) auto-start service beaconing to 96.255.98.154:29932 Two independent tools (Volatility3 + Mandiant Redline .mans) confirm usboesrv.exe pid27304 ppid556(services.exe) AUTO_START service, C:\Windows\system32\usboesrv.exe sha256 5420d06d..., 3x ESTABLISHED 10.3.58.4->96.255.98.154:29932. In-memory config 'USB over Ethernet\v2.0\ServersDB\96.255.98.154:29932'. + kernel drive	0.95
HIGH	T1011	win2008R2-controller	Virtual USB-over-IP device-tethering channel via usboebusdrv (USB-over-Ethernet) on the DC usboebusdrv.sys is a Virtual USB Host Controller driver enabling USB device redirection over the network; device objects \\.\usboehc\usboedev\usboebusdev\usboeloderdev. Provides remote USB tethering/exfil distinct from physical media (DC USBStor is empty).	0.78
HIGH	T1071.001	win2008R2-controller	Anomalous kernel-resident C2: System (pid4) ESTABLISHED 10.3.58.4:443 -> 173.173.88.154 Volatility + Redline both show System pid4 holding ESTABLISHED outbound to 173.173.88.154:18682 from local :443 - System does not originate outbound 443; consistent with the usbo* kernel drivers. Second DC C2 IP.	0.75
HIGH	T1055	win2008R2-controller	Process injection: RWX in explorer.exe (pid8512) spawning usboe.exe + operator cmd.exe malfind: explorer.exe pid8512 PAGE_EXECUTE_READWRITE @0x2280000/0x38e0000; parent of usboe.exe pid27144 and attacker cmd.exe pid148904 (2012-04-06 14:08).	0.8
HIGH	T1620	win7-32-nromanoff	spinlock.exe: PyInstaller(Py2.5) in-memory MSF windows/x86 reverse_tcp loader -> 199.73.28.114:443 Manually carved (no decompiler): main PYSOURCE script = 9-line ctypes runner executing a 290-byte Metasploit reverse_tcp stager (block_api prologue fc e8 89 00 00 00; connect 199.73.28.114:443 RAW TCP, VirtualAlloc RWX, recv stage-2). Present on nromanoff/nfury/DC/xp. Reflective in-memory exec (T1620).	0.9
HIGH	T1036.005	win7-32-nromanoff	Masquerade: winclnt.exe (downloaded, Zone.Identifier) renamed to System32\dlhost\svchost.exe \$UsnJrnl: winclnt.exe dropped to vibranium\Downloads with Zone.Identifier ADS (internet download) 22:40, moved into new System32\dlhost dir 23:35, renamed to svchost.exe 23:38 - LOLname masquerade of the httpump client.	0.85
HIGH	T1070.004	win7-64-nfury	Indicator removal: PsExec self-delete, _MEI PyInstaller cleanup, fake-svchost dir + staging teardown \$UsnJrnl: PSEXESVC.EXE FileCreate->FileDelete ~1-2s on each target; _MEI* temp cleanup; nfury System32\dlhost fake-svchost dir DELETED 2012-04-06 18:42; exfil staging dirs system4-7 swept 18:20. Anti-forensics MODERATE (implants left, tooling hidden).	0.72
HIGH	T1021.002	xp-tdungan	PsExec hub-and-spoke lateral movement from xp-tdungan operator console to nromanoff/DC/nfury xp-tdungan(10.3.58.7) is the SOLE host with HKCU\Software\Sysinternals\PsExec\EulaAccepted (vibranium/RSydow/tdungan/SRL-Helpdesk); regripper negative on all others. 7045 PSEXESVC installs: nromanoff(7x,04-03 21:11), DC(6x,04-04 17:29 EULA same-second), nfury(4x,04-05 17:03); vibranium MountPoints2 \\.4/.5/.6\C\$; PsExe	0.9
HIGH	T1569.002	win7-32-nromanoff	Remote SYSTEM execution via PSEXESVC service (parent of spinlock.exe + httpump) PSEXESVC.EXE (LocalSystem) is the common parent of spinlock.exe(2956) and httpump fake-svchost(6404) on nromanoff - implants executed remotely as SYSTEM via PsExec service.	0.85
HIGH	T1078.002	xp-tdungan	Compromised domain account shieldbase\vibranium reused across hosts; cleartext password recovered vibranium cleartext password 'hailhydra' recovered from xp csrss console-title memory (net use z: \\10.3.58.5\C\$/USER:shieldbase\vibranium hailhydra). Network logons to DC from 10.3.58.5/7.4; profile resident on all 4 hosts.	0.85
MEDIUM	T1078.002	xp-tdungan	Multiple domain accounts abused across the campaign (RSydow, tdungan, SRL-Helpdesk) PsExec EulaAccepted on xp under RSydow(04-03 21:11 campaign start), tdungan(04-04 14:37), SRL-Helpdesk(04-06 19:22 late reuse) in addition to vibranium - account rotation from the single operator console.	0.7
HIGH	T1005	xp-tdungan	Targeted collection of Vibranium/Alloy R&D + classified undercover-agent rosters vibranium-accessed (LNK/MFT \$A): xp Alloy Research\Detailed Vibranium R&D Documents\ (SUCCESS-TEST-PLAN-VIBRANIUM-ALLOY-RESULTS.docx +	0.8

Memory_Metals/Kaiser/Armor_School/Nanowire/Metals) and nromanoff Agents-List-CLASSIFIED-TOP-SECRET.zip (Undercover-Agents-List-For-Spain/Australia/UK/US).

HIGH	T1560.001	win7-64-nfury	Exfil data staged & archived: system4.rar (RAR3 header-encrypted, 6.3MB) on nfury MFT: \Users\Public\Temp\system4.rar built 2012-04-06 13:48-13:53 from staging dirs system4-7 (archive-via-utility, RAR3 header-encrypted). Staging dirs swept 18:20.	0.85
HIGH	T1052.001	win7-64-nfury	Exfiltration over physical USB: HP v100w (S/N AA951D0000007252) carrying system4.rar HP v100w USB (S/N AA951D0000007252) mounted E: on nromanoff/nfury, roamed xp->nromanoff->nfury 04-06/07; system4.rar staged on nfury for transfer. CAVEAT: E: volume not imaged - exfil-over-USB is HIGH-confidence staged, contents inferred (rar encrypted).	0.75
MEDIUM	T1091	xp-tdungan	Removable-media (HP v100w) used as cross-host delivery/staging vector Same HP v100w device enumerated on xp(2012-04-06)/nromanoff(04-07 10:31)/nfury(04-07 18:50) - candidate replication/delivery vector across the workstation fleet in addition to PsExec.	0.65
HIGH	T1071.001	win7-32-nromanoff	httpump HTTP backdoor: winclient.exe (as System32\dlh\host\svchost.exe) WinINet C2 CORRECTED: the full httpump client = winclient.exe sha256 f293fdb9... (PDB d:\work\hg\httpump\winclient\...\winclient.pdb), renamed to System32\dlh\host\svchost.exe, WinINet C2 http://<INTERNAL-IP>/ads/ (internal pivot); winclient.reg config [HKLM\SYSTEM\CCS\Services\Netman\domain] home=http://199.73.28.114/ads/. a.exe	0.85
HIGH	T1070.006	win7-32-nromanoff	Timestomping of the fake svchost.exe (winclient httpump) - \$SI backdated to 2003-03-31 CORRECTED: confirmed-malicious fake svchost.exe (=winclient.exe, sha256 f293fdb9) has MFT \$SI created backdated to 2003-03-31 12:00:00 (OS-install epoch, uSec-zeros) while \$FN reveals real drop 2012-04-03 22:40:24 = deliberate timestomp. NOTE: pe.exe (reassessed = genuine signed Sysinternals PsExec v1.98) and logon.scr	0.82

4. Indicators of Compromise — Threat-Intel Enrichment

All 109 enriched indicators with VirusTotal / OTX verdicts. The **12 malicious** indicators are highlighted in red.

12 confirmed-malicious indicators — these gate the campaign verdict and are live in the Wazuh active-response CDB lists.

Malicious indicators (highlighted)

5. Wazuh Push Status

Wazuh push status — DRY-RUN VERIFIED, LIVE FINDINGS PUSH BLOCKED (safety hold).

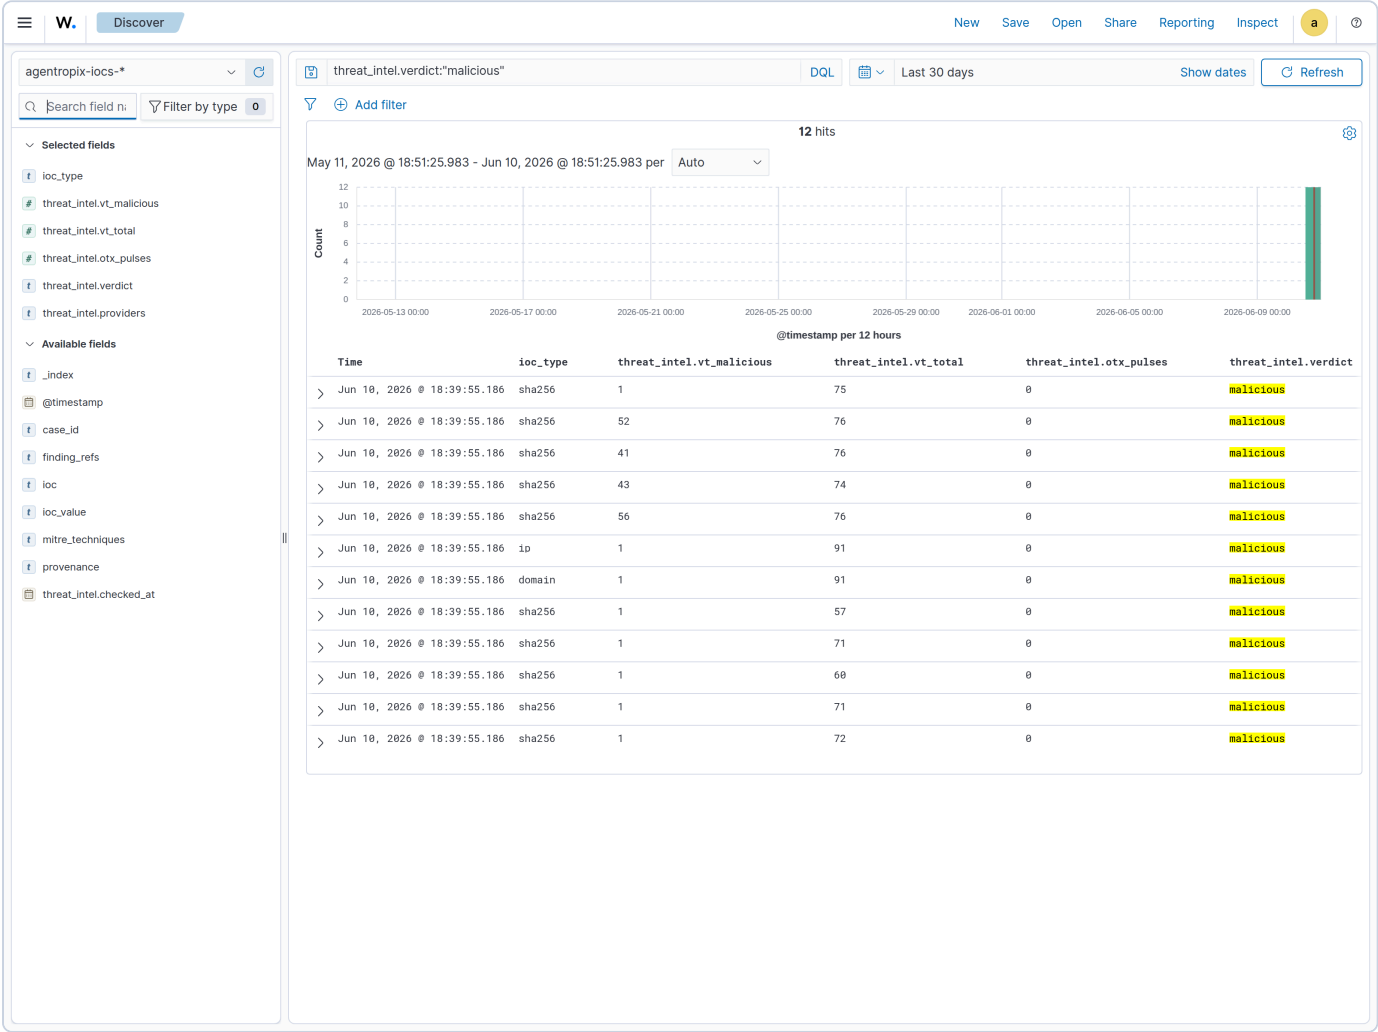

Findings: dry-run validated all **2,233** findings successfully (`dry_run_ok=true`). Live indexing was **intentionally blocked**: the sanctioned wazuh `_index_findings` bulk path auto-generates `_id` (no deterministic `finding_id` keyed mapping), so a live re-push would **duplicate** rather than replace. The index already holds **2,194** SRL-2015 docs (1,590 distinct, 604 dup); **~2,874** evidence docs are live across the case. A non-destructive deterministic-`_id` fix is not exposed by the approved tool, and editing the sealed orchestrator / ADR-016 is a Hard-Stop — so the run halted rather than pollute evidence.

IOC threat-intel lists (Wazuh CDB) — LIVE and merged. SRL-2015 malicious indicators are live in the active-response CDB lists: `agentropix_malware_sha256` (47 total · 37 SRL-2015), `agentropix_c2_ips` (8 · 6 SRL-2015), `agentropix_persistence_regkey` (4 · 3), `agentropix_suspect_process` (8 · 3). Vanko-case IOCs preserved (no deletions).

Wazuh Console Evidence (reconciliation screenshots)

Captured from the live Wazuh / Agentropix reconciliation console for case SRL-2015-APT-ENTERPRISE.
